REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed an unobvious improvement over U.S. Patent 1195980 to Davis and JP 2001-099356 to Sawa. Davis discloses a pair of cylinders mounted in parallel on a base for synchronous operation having a control valve and piping controlling fluid supply and discharge from the cylinders. Sawa discloses a control valve secure to a boom between a pair of parallel cylinders having piping controlling fluid supply and discharge from the cylinders. The unobvious improvement includes the control valve positioned between and mounted to the parallel cylinders by elastic support mechanisms and metallic piping with curved portions providing flexibility for absorbing relative displacements of the cylinders.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
